

I completely support XM radio's FIRST AMENDMENT right to provide weather, news or what ever format or programming the client base requests or is fiscally responsible for XM to provide to its listener group. In my opinion the FCC nor any other body has the right to challenge what listeners in this country want to hear. The NAB is simply trying to manage a monopoly in terms of allowing competition to grow in their sector. Please feel free to contact me regarding my comments. Sincerely and with warm regards,  
Wm. A. Olden
